DUAL CAM SYSTEM

MOTORIZED IRIS FOCUS ZOOM LENS

REMOTE CONTROL COLOUR Multi matrix support

Features

The Waterline Dual Cam provides two perspectives on the same image: one from above and another from below the waterline. This allows for a seamless horizontal scroll to explore a precisely defined image. Despite the presence of waves and ripple effects, a clear, uninterrupted horizontal line divides the integrated waterline image.

Dual Cam System:

- Motorized iris focus zoom lens
- Remote control Color: Multi matrix support
